Radiant Spareparts Co LLC is an established wholesale and retail dealer of industrial filtering solutions in United Arab Emirates. Based in Sharjah, we distribute complete industrial and commercial filtering solutions to various companies and customers since 1987. From Marine Engine Filters, Oil field filters, Heavy Equipment Filters, Truck and Bus Filter to Light Vehicle Filters, we deliver it all. After years of serving the automotive industry, Radiant continues building a reputation for supplying quality products which provide reliable performance and superior value. We offer fast filter delivery to commercial, educational and industrial customers across UAE. We have also ventured into Automotive Oil and Heavy duty battery sales. We partner with globally recognized manufacturers and provide the best customer service in UAE.

Radiant has showrooms in Dubai, Abu Dhabi, Sharjah, Fujairah and Ras Al Khaimah. we create a reliable and mutually beneficial relationship with the clients assuring them the finest products and services. We take individual responsibility for meeting our shared goals and honoring our commitments to each other and our customers. Our own staff is backed by the research and production facilities of our suppliers. Our sales engineers are trained and experienced in all areas of filtration.

Sakura Filter has more than 45 years experience in the filtration business. We operate under PT Selamat Sempurna Tbk. (SMSM), the flagship of the Automotive Division Group and currently the largest filter manufacturers in the region.

In the filtration business, Sakura Filter offers the largest range of application of more than 7.000 part numbers for OEM/OES as well as aftermarket. It covers automotive, commercial, heavy equipment, marine, and industrial for American, European, and Asian applications. All products are tested to the ISO/IEC 17025:2005 standard and accredited laboratory.

Sakura constantly improving their facilities, warehouses, and equipments in order to offer customers quality cost and delivery program, as to reduce lead time and unwanted cost.

All of Sakura filters are certified to SAE International standards which are used to ensure the performance and quality of products.

Sakura Oil Filters

Sakura Air/Oil Separators

Sakura EDM Filters

Sakura filter has one of the largest production capacity for filtration products with approximately 96 million pieces annually. Have two production centers that are located in north Jakarta on 5 hectares of landscape and in Banten on 75 hectares of landscape. Every factory unit in these plants is effectively integrated with each other to maximize productivity

All of sakura filter products are made by their companies that are certified to the IATF 16949 to meet or exceed the quality, performance, and requirements of OEM/OES and aftermarket.

Sakura Filter addresses deep commitment to quality by achieving certification of four international standards. By adhering to these standards, They implement the highest quality practices in all phases of operation.

Sakura filters are tested to meet the highest JIS standards to ensure they meet the standards for industrial activities in Japan.

Sakura oil filters are designed and made to the exact standard to reduce frictional wear by eliminating the particulates release from frictional parts and combustion. This enhances efficiency and life expectancy of the engine

Sakura air filters are manufactured to remove particulates from the air before entering into the combustion chamber, thus keeping the engine cleaner.

Sakura fuel filters eliminate fine contaminant from entering the fuel, injection system keeping them clean and overall cost down.

Sakura coolant filters remove contaminants and prevents the formation of scale on metal surfaces in the cooling system while it works to help maintain proper heat transfer for optimum engine life and performance.

MANN FILTER

MANN+HUMMEL was founded in 1941 as a family-owned company and has remained so until today. In their daily work, employees experience our values. They make us an above-average employer. In the development of our products our employees apply all their knowledge and energy to find the best possible solution – something which is felt by our customers and clients. The application areas of products are just as varied and diverse as our employees.

Our systems are used all over the world and even under extreme conditions meet all of the quality and safety requirements. Thanks to our experience in the area of filtration and our flexibility, we are a valuable partner for our customers. In our company profile you can read some surprising stories and facts about the company.

MANN+HUMMEL has been run as a family business with constant growth in revenue for four generations. In Ludwigsburg, members of the families Lachmann, Klamert and Geiger met up for a family get-together. It is a vibrant exchange about 75 years of MANN+HUMMEL history.

Bristol Filters UK is an industry leader in the development, manufacturing and distribution of high-quality filtration solutions. Founded in 2016, the company has grown to become a prominent fixture in the industrial sector for heavy equipment filtration and is renowned for its commitment to quality, innovation, and customer satisfaction.

Bristol Filters UK has a long-standing reputation for excellence and is proud to be a trusted partner for many of the world's leading companies for manufacturer-branded filters. Our success is built upon a commitment to the highest standards of engineering and design. We use advanced technology and innovative techniques to ensure that our customers receive the best possible filtration solutions. Over the years, we have consistently worked to remain at the forefront of the filtration industry, utilizing the latest technological developments and innovations to offer the best solutions for our customers.

Our comprehensive range of 1000+ products covers a wide range of applications from oil, air, fuel, transmission and hydraulic filters. Our team of expert engineers and design professionals are dedicated to providing our customers with the most up-to-date and effective filtration products available. We are always looking for new and innovative ways to improve our filtration processes, ensuring that our customers get the best performance from their systems.

Bristol Hydraulic Filters

Bristol Filters UK has a highly experienced team of technical specialists and customer service representatives, who are committed to providing the highest levels of service and support. We are committed to providing our customers with the latest technical advice and support, enabling them to make informed decisions when purchasing our filtration products.

We believe that our commitment to quality and customer satisfaction makes us one of the leading manufacturers of filtration systems in the world. Our products are designed to meet the highest standards and are manufactured using the latest technologies and materials, ensuring they provide reliable and cost-effective filtration solutions.

Heavy duty Air Filters

Air Filters

Cummins - Fleetguard Filtration began in 1958 as a single filter production line developed by Cummins Engine Company to meet the high performance requirements of Cummins diesel engines. Then known as the Seymour Filter Company, the facility was located in Seymour, near the Cummins headquarters in Columbus, Indiana. Production in those early years consisted of two employees sewing together cloth-bag lube-oil filters. In 1963, the company changed its name to Fleetguard, the brand that became the cornerstone for the diesel engine filtration industry. In 2006, the company name was again changed to Cummins Filtration, though our products still bear the Fleetguard name to stand strong in the global aftermarket. Nearly sixty years after the first bag filters were sewn, Cummins Filtration is the technology leader in filtration products for heavy-duty diesel engines with a global presence on six continents and over 4,000 employees.

Trust EUROSONIC 'S innovative Technology

Take a powerful ride with EUROSONIC starter batteries. Whether it's for an entry level vehicle or high-end performance car, EUROSONIC batteries provide reliable starting power that goes all the way through to the end of your journey.

As always EUROSONIC'S outstanding product quality is the result of our innovative technology.

EUROSONIC BATTERIES

Delivering outstanding product quality through innovative technology:

- Long Life
- Enhanced Power
- Reliable Performance
- Improved Safety and Usability

BATTERY STRUCTURE

- 1 X-Frame Technology and high Durability Technology
- 2 Enveloped separator for low electric resistance
- 3 Advanced center lug technology and cast on strap
- 4 Sealed double lid with frame arrestor
- 5 Integrated computer design and reinforced container
- 6 Magic eye indicator

GET ALL THE POWER YOU NEED

Special Tissue

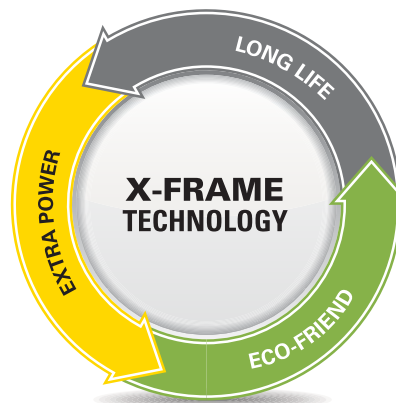

* These images of electron microscope show the surface of a tissue after a life cycle test.

X-FRAME TECHNOLOGY : MAXIMIZED POWER & ENHANCED STABILITY

EUROSONIC produces patterned and fully framed grids through a manufacturing process called "stamping".

Compared to conventional batteries with expanded metal grid, EUROSONIC's batteries deliver longer life and stable power flow.

Long Life

- Rolling & Stamping Process
 - Excellent corrosion resistance
 - Outstanding mechanical performance
- Full Framed Grid Design
 - Prevents grid growth & short circuits

Extra Power

- Radial Grid Design
 - Ensures low electrical resistance
- Advanced Center Lug
 - Better power flow

Eco-Friendly

- Production process is more eco-friendly

High Durability Technology : EXTENDED BATTERY LIFE

EUROSONIC batteries provide extended life cycle through the High Durability Technology. Using cutting-edge materials, the High Durability Technology protects the grid until the end of the battery life and improves the battery performance.

Ultra Micro-Fiber & Special Tissue

- Increases plate durability by reducing the aging- rate of active materials.

SMF BATTERIES

Sealed Maintenance Free Batteries

EUROSONIC SMF Battery is the ideal choice for standard vehicles with usual power demands. It's maintenance free and it provides reliable power support for all applications. **EUROSONIC** offers a complete range of SMF Batteries for all of European, Asian and American vehicles.

MAIN BENEFITS:

- Reliable starting power with X-Frame Technology
- High Durability Technology delivers longer service life
- A complete range offered for 99% of vehicles on the market

PERFECTLY POWER SOLUTION FOR COMMERCIAL VEHICLES

Demanding commercial vehicles require nothing less than the most powerful, reliable, durable batteries. The **EUROSONIC** Commercial Batteries have excellent starting power to provide the best starting, higher reserve capacity and deep discharge cycling to provide the reliable power.

As always, **EUROSONIC** outstanding product quality is the result of our innovative technology.

KEY FEATURES AND BENEFITS OF THE EUROSONIC COMMERCIAL LINE

- Advanced calcium lead alloy provides reducing the battery's water consumption to a minimum
- Thicker plate design with grid protection tech. resist the damaging effects of vibration delivering more cyclic stability than other batteries.
- High performance polyethylene separator with fleece specially designed for heavy duty batteries
- The labyrinth double lid with flame arrestor provides completely maintenance free and safety
